

Australian Game Product List

for the Food Service Industry

From the ever-increasing interest, exotic meats are becoming more commonplace on menus today bringing a sense of adventure to the table. This has inspired Haverick Meats to source an extensive selection of game products from approved and trusted suppliers, Australia wide. Whether free-range, organic, grain, grass or corn-fed, all are prepared daily, based on any specification. Rest assured our expert buyers and sales teams are continually sourcing unique, specialised and exciting selections available throughout all seasons.

Our game products are sourced from a selection of suppliers from small, boutique and accredited farmers and growers who take tremendous pride in their product. Year round, we ensure to have the largest, most extensive inventory of game meat products available for your menu, from Australian venison, to ducks, pheasants, partridge, wild hare, squab, quail, guinea fowl or white rabbit and other exotic hard-to-find products.

To complement our products and one that is much-admired, is the entirely nature-farmed, Cervena® Venison, from the lush green pastures of New Zealand. Cervena® Venison is comprised from a collective group of long-term committed producers that are renowned internationally in the foodservice industry to produce venison that is subtle and delicate in flavour, exceptionally tender and deep carnation-like colour. New Zealand Cervena® ensures only the highest quality venison is produced where product quality is carefully monitored at every stage from the farming and transport of the deer, at the processing plant, to the final delivery.
